

1                   **ABSTRACT OF THE DISCLOSURE**

2                   A casing has a hollow body, at least one wheel holder and at least one  
3                   wheel. The body has at least one cavity to respectively receive the at least one  
4                   wheel holder. Each wheel is rotatably mounted on one of the at least one wheel  
5                   holder. With the arrangement of the at least one wheel, the casing can be  
6                   transported conveniently and easily.
